Figure 1 displays five monthly calendars (February to July) showing the distribution of 500 simulated cases across different stages (L1, M2 EPR, M2 EPA, M1 M2E, M2 M2E, FS 50%) and the impact of various interventions (CRPE, Massé, Stage HE, Révisio, CRPE 2, Révisio CRPE 7, Révisio CRPE 2).

The calendars are organized by month, with rows representing days (1 to 31) and columns representing stages. The stages are color-coded: L1 (light blue), M2 EPR (light green), M2 EPA (light yellow), M1 M2E (light orange), M2 M2E (light green), and FS 50% (light green). The interventions are indicated by colored boxes: CRPE (light blue), Massé (light green), Stage HE (light yellow), Révisio (light orange), CRPE 2 (light green), and Révisio CRPE 7 (light orange).

The calendars show the progression of cases over time, with the number of cases in each stage decreasing as the month progresses. The interventions are applied to specific stages, and their impact is visible in the distribution of cases.
